## Five Factors for Cleaning

- Water Quality
- High levels of water hardness & total dissolved solids (TDS)
- Water quality must be accounted for when washing and blending detergents
- Soap Pressure
- Applying detergents at higher pressure will improve brushless cleaning and increase efficiency

Applying at low pressure and low volume will stretch your detergents and can lower costs

Temperature

Water temperature and atmospheric temperature will affect detergent performance

For every 18 degrees in temperature rise, molecules move twice as fast

## Detergent Concentration

- Relative strength of detergent blend used AND the dilution rate of application method
- Adding a preset mixing valve or mixing station will make your process more efficient
- Dwell Time
- Too much means soaps could dry or cause harsh reaction; too little means not enough reaction

## Request a Five Factor, Cleaning System Check Up from High PSI

Did you know water quality is one of the leading factors in whether a detergent works well or not? Did you ever wonder what's in your detergent? We offer a program where we will come in free of charge to check the following:

### What We Will Test

- Check heat and pressure of your pressure washer
- Testing of water hardness with a TDS meter
- Testing pH level of your detergent
- Test the concentration level of your existing detergent with a refractometer
- Test the concentration level of detergent at the end of your gun & wand

### What We Will Do for You

Set your washer for your specific needs. Including, pressure, temperature, nozzle size and pattern.

Provide a detergent that is not only best for your cleaning needs but also works well with your water quality.

Training on how to best use the detergents to maximum benefit. Yielding better results and cost savings.

Our trained professionals have seen many different cleaning processes and will be able to make your operation faster, better and more efficient.

### What Will You Learn From this FREE Analysis?

- You'll know if your equipment is operating at optimal cleaning performance
- You'll know how hard or soft your water is
- You'll know whether you are using a concentrated or pre-diluted product
- We will give you recommendations on how you can improve cleaning performance

## FLEET WASHES

### PANDA

- “Polish safe” fleet wash for sensitive surfaces.
- Effectively removes road film, bugs, grease, and oil residues.
- Produces thick foam profile
- Easy Rinsing
- Heavy-Duty Formula

### PLATINUM WASH

- Safe for Aluminum
- Restores Faded Paint
- Versatile Cleaning Power
- Food-Safe Applications
- Removes dirt, grime, bug splatter, tar, sap, and brake dust.
- Leaves Glossy Finish

## SUPER SHINE VEHICLE WASH

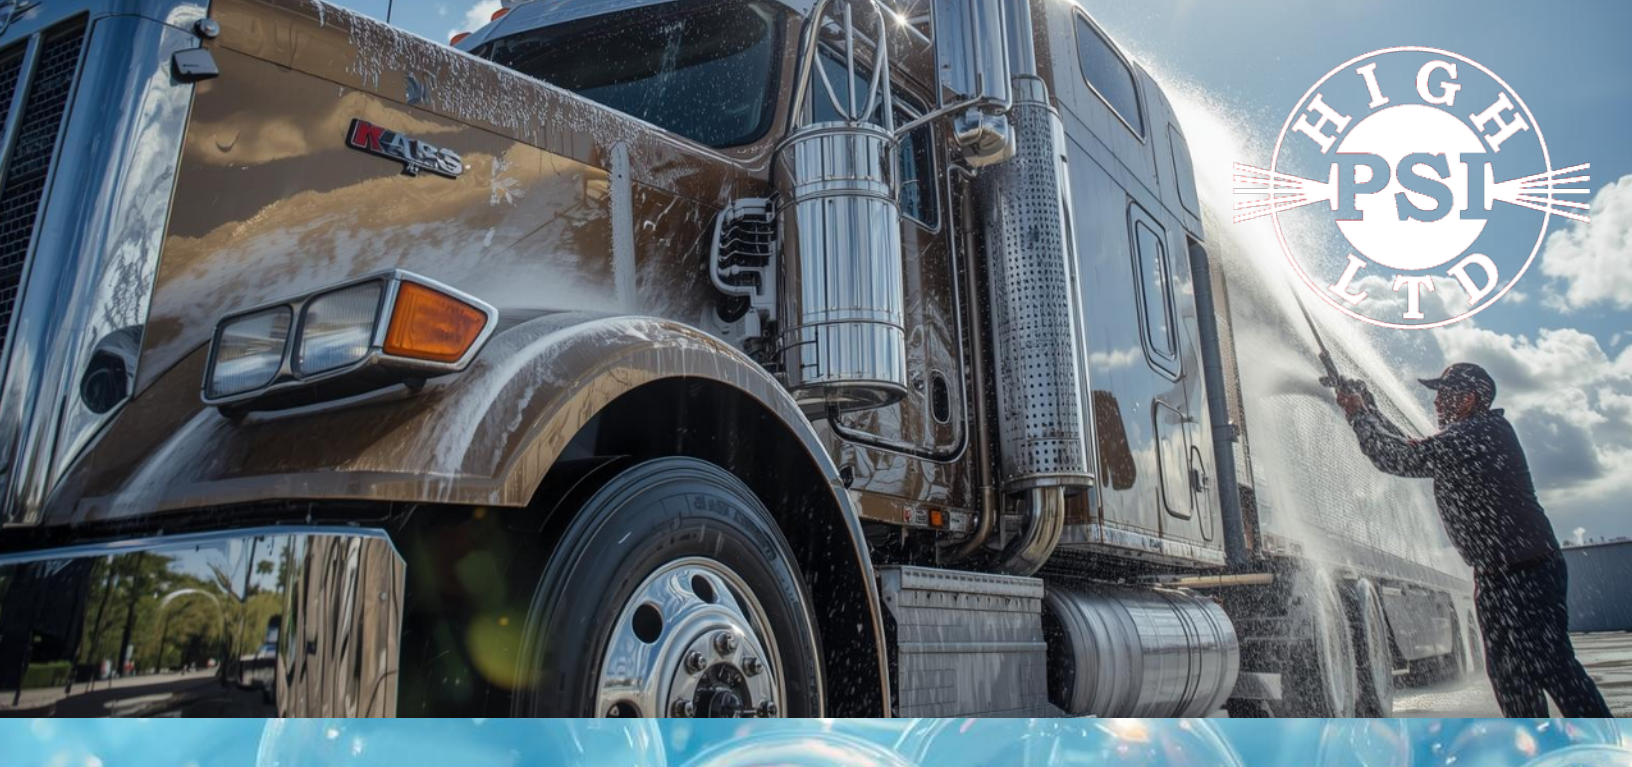

- Effectively removes grease, grime, and contaminants
- Economical & Efficient – Low per-gallon cost
- Good for Hot or Cold Water Use
- Corrosion Inhibitors
- Anti-Scale Protection
- Eco-Friendly Formula

## LIGHTNING WASH

- Completely Biodegradable
- Versatile Cleaner
- Food-Safe Applications
- Corrosion Protection
- Exceptional Bug Removal
- Powerful Cleaning Action
- Safe and Effective

## TRUCK-N-TUFF

- Super concentrated
- Exceptional hard water performance
- High foam profile
- Does not require brushing
- Safe on paint and polished aluminum

## ALUMINUM BRIGHTENERS

### ADVANCED ALUMINUM BRIGHTENER

- Restores Aluminum Surfaces – Cleans and brightens stained aluminum without “burning” the surface.
- Best used on frame rails and other unpainted aluminum surfaces.
- Surface Restrictions – **Do not use on glass, polished aluminum, or anodized aluminum.**
- Phosphate-Free Formula

### POLISHED ALUMINUM BRIGHTENER

- Specialty Formula – Non-etching
- Quickly penetrates and removes dirt, grease, oil, road film, diesel smoke, and welding smut.
- Mild Aluminum Brightener – Safe for use on polished tanks and aluminum
- Restores Shine

### LUMA SHINE B

- Highly Dilutable Formula
- Versatile Performance – Excellent for most aluminum brightening applications.
- Restores Oxidized Surfaces
- Safe, Non-Acid Formula
- Surface Restrictions – **Not recommended for use on polished aluminum, glass, or anodized aluminum.**

# DEGREASERS

## SLUDGEHAMMER

- Powerful Concentrate
- Versatile Application – Prespray use or through pressure washer
- Effective Degreasing
- Potassium Hydroxide Formula – Provides strong cleaning power for industrial and commercial use.
- Our MOST popular degreaser

## PREP-SOLV

- Powerful Degreaser – Non-caustic, non-butyl formula
- High-Performance Surfactants
- Versatile Use
- Flexible Dilution
- Surface Safe
- Heavy-Duty Performance

## SUPER SAFE DEGREASER

- Barrier Protection & Restores Surfaces
- Industrial Strength Formula
- Safe & Non-Toxic, biodegradable.
- Environmentally Friendly – Breaks down into non-toxic materials, safe for use around plants, grass, and soil.
- Anti-Scale System

## SPECIALTY CLEANERS

### SALT LICK

- 2-in-1 Salt Neutralizer & Fleet Wash
- Dual-Action Formula – Combines a salt neutralizer and fleet wash in one easy step.
- Removes Salt & Residue
- Prevents Re-Crystallization
- Protects Equipment – Helps prevent corrosion
- Easy Rinsing Formula

### BARRACUDA CONCRETE STRIPPER

- Removes Concrete, Non-Corrosive
- 100% Synthetic Acid, Non-Fuming
- Non-D.O.T. Regulated
- 100% Biodegradable
- Safe on Glass & Chrome
- Removes Mineral Stains
- Safe on Skin

### CONCRETE TRUCK CLEANER

- Super Concentrated
- Do not use on glass or anodized aluminum
- Contains Hydrochloric and Phosphoric Acid
- Do not allow to dry on surfaces

# GRAFFITI REMOVERS

## ELEPHANT SNOT

- Formulated for Porous Surfaces – The ideal choice for concrete, brick, stone, cement, grout, and other porous materials.
- Deep Penetration – Penetrates deeply into surfaces to dissolve and loosen stubborn graffiti and tags.
- Powerful Performance – The workhorse formula for the toughest porous surface graffiti removal challenges.
- Easy Rinse Removal

## SMOOTH MAX

- Versatile Cleaner – Effectively removes graffiti, road tar, asphalt, tree sap, and other tough residues.
- Designed for Smooth Surfaces
- Safe for Wood
- Powerful Removal Formula – Cuts through the toughest substances without heavy scrubbing.

## SHADOW MAX

- Removes Shadows & Ghosting
- Ideal for Porous Materials
- Safe for Natural Stone & Wood
- Tile & Grout Safe – Suitable for porcelain, glazed or ceramic tiles, and grout surfaces.
- Do Not Use On – Not recommended for metal finishes, plexiglass, or Lexan surfaces.

## MAX SWIPES

- Convenient Towelettes – Pre-moistened wipes for quick, easy graffiti removal on the go.
- Formulated for Smooth Surfaces – Ideal for metal, glass, painted surfaces, and other durable materials.
- Fast & Effective – Removes graffiti, paint, ink, and other marks without harsh scrubbing or damage.
- Portable & Ready to Use
